

KE-20S PROFESSIONAL FM BROADCAST TRANSMITTER FOR 88-108 MHz

This is a highly Professional stereo broadcast transmitter for 88 MHz -108 MHz. The power output is 25 W / 50 ohms adjustable. Fully synthesized from 88 MHz- 108 MHz this unit was built with a special audio limiter and filters for the best performances. This is the one of the best broadcast transmitters on the market! You can easy change the frequency internally. This transmitter is broadband and doesn't need any adjusting.

Technical Specifications	
Operating Frequencies:	88-108 MHz
Operating class:	C
AC Voltage:	110-240V
RF power:	25 W MAX.
Inputs:	XLR FEMALE STEREO
Minimum required voltage:	120 V
Battery power:	N/A
Audio distortion:	0.3 %
Audio Modulation:	WFM
Current Consumption:	2 A
Antenna Impedance:	50 ohm
Antenna Connector:	N
Temperature Range:	-10 + 65°C
Dimensions:	19"
Weight:	15 Lbs
