

LX-900BM

HIGH POWER VIDEO SENDER

900 MHz

This special Video TRANSMITTER is excellent for live transmission and long range applications without obstructions. LX-900 uses UHF band 900 MHz and it has 2 W RF power. It is a single channel unit. You can choose two frequencies: 906 MHz or 916 MHz. Recommended receiver is excellent RM-900B model. A special antenna 900 MHz is required with this. This transmitter doesn't require any tuning or maintenance.

Technical Specifications	
Battery Power	12-14 V
RF power	1.8 W
Connector	N type
Current consumption	1 A
RF In/Out	50 ohms
Video input	1 V BNC
Frequency	916.6 MHz
Picture	Broadcast quality picture
Size	4.2"x2.2"x1
Audio	N/A
Video impedance switch	
Amplitude modulation	
Wideband operation	
Over temperature protected	
VSWR protected
