

NEW MODEL HIGH POWER WORLD'S SMALLEST UHF WIRELESS VIDEO CAMERA

# CSS-59C WIRELESS VIDEO CAMERA 434 MHz

Designed for experiments or video-surveillance

This little color camera with the World's smallest video transmitter for **CH 59 CABLE UHF** is the smallest **high power** unit on the market designed for experiments or video-surveillance. This pin hole color camera will send the picture direct to your TV set or VCR tuned to CH 59 UHF CABLE, you don't need any special receiver!

The camera has 330 lines of resolution. Battery 9 V Duracell will last over 8 Hours!! The unit measures only 0.7" X 0.7" X 0.8". You can pick-up the signal using any kind of TV set tuned at CH 59 Cable, or UHF band- just below CH14 on the most handheld TV's. It is great for your cottage, beach house or even car or any kind of video-surveillance.

Model number: **CSS- 59C**
